

TM TECHMAN ROBOT

- Subsidiary of Taiwan-based manufacturing giant Quanta Computer.
- Has earned the second largest market share in collaborative robots.
- Originally conceived and realized for their own manufacturing operations' most demanding requirements.
- Reliability and performance makes them the price-performance leader in collaborative robotics.

Regular Payload Series

TM5-700

Payload: 6 kg
Reach: 700 mm

TM5-900

Payload: 4 kg
Reach: 900 mm

Medium-Heavy Payload Series

TM12

Payload: 12 kg
Reach: 1300 mm

TM14

Payload: 14 kg
Reach: 1100 mm

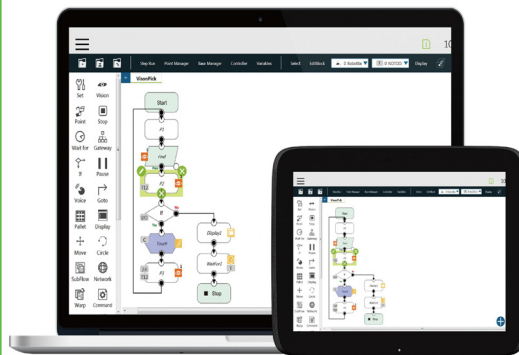

Powerful Integrated Vision

- Integral vision for guidance, inspection, and barcode/QR Code/2D DataMatrix identification.
- Calibrate with one click.
- TM Landmark enable adaptation to changing workspaces.
- AI, 3D, and external camera functionality available.

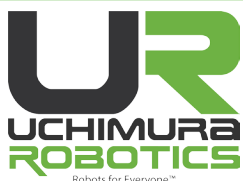

Simple User Interface

- User-friendly, click-and-drag flow-based editing software allows users to design cobot workflow without programming.
- TM ROS Driver available.

Palletizing Platform

- TMstudio Palletizing Wizard enables simple setup including simulation and collision detection.
- Inquire about available platforms and solutions to speed implementation.
